

## CONTENTS

- 1 Introduction
  - 1.1. Resemblances, Variances, and Breeding Values
  - 1.2. Single Trait Parent-offspring Regressions
  - 1.3. Multiple Trait Parent-offspring Regressions
- 2 Selection Response Under the Infinitesimal Model
  - 2.1. The Infinitesimal Model
  - 2.2. Changes in Variances
  - 2.3. The Roles of Drift and Mutational Under the Infinitesimal Model
- 3 Fitnesses
  - 3.1. Individual Fitness
  - 3.2. Episodes of Selection
  - 3.3. The Robertson-Price Identity,  $S = \sigma(w, z)$
  - 3.4.  $I$ , The Opportunity for Selection
  - 3.5. Some Caveats in Using the Opportunity for Selection
- 4 Fitness Surfaces
  - 4.1. Individual and Mean Fitness Surfaces
  - 4.2. Measures of Selection on the Mean
  - 4.3. Measures of Selection on the Variance
  - 4.4. Gradients and the Geometry of Fitness Surfaces
  - 4.5. Estimating the Individual Fitness Surface
  - 4.6. Linear and Quadratic Approximations of  $W(z)$
- 5 Measuring Multivariate Selection
  - 5.1. Changes in the Mean Vector: The Directional Selection Differential  $S$
  - 5.2. The Directional Selection Gradient  $\beta$
  - 5.3. Directional Gradients, Fitness Surface Geometry and Selection Response
  - 5.4. Changes in the Covariance Matrix: The Quadratic Selection Differential  $C$
  - 5.5. The Quadratic Selection Gradient  $\gamma$
  - 5.6. Quadratic Gradients, Fitness Surface Geometry and Selection Response
  - 5.7. Estimation, Hypothesis Testing and Confidence Intervals
  - 5.8. Geometric Aspects
  - 5.9. Unmeasured Characters and Other Biological Caveats
- 6 Multiple Trait Selection

- 6.1. Short-Term Changes in Means: The Multivariate Breeders' Equation
- 6.2. The effects of genetic correlations: direct and correlated responses
- 6.3. Evolutionary constraints imposed by genetic correlations
- 6.4. Inferring the Nature of Previous Selection
- 6.5. Changes in  $G$  under the infinitesimal model
- 7 Phenotypic Evolution Models
  - 7.1. Selection vs. Drift in the fossil record
  - 7.2. Stabilizing Selection
- 8 Theorems of Natural Selection: Fundamental and Otherwise
  - 8.1. The Classical Interpretation of Fishers' Fundamental Theorem
  - 8.2. What Did Fisher Really Mean?
  - 8.3. Heritabilities of Characters Correlated With Fitness
  - 8.4. Robertson's Secondary Theorem of Natural Selection

Final Remarks and Acknowledgments
